13.30–14.30 Simulation round 1
14.30–14.45 Break
14.45–15.15 Simulation round 2
15.15–15.45 Case studies
15.45–16.30 Discussion and follow up
16.30 Close

The Workshop

This interactive workshop will introduce delegates to the concept and practice of lean construction and process waste elimination. Delegates will take part in a simulation exercise to experience first hand some of the key concepts of lean construction and how lean thinking can be practically applied to improve operations.

Lean construction is not new and although not yet widely accepted, there are many case studies available. The following are examples of outcomes achieved

- on time, void maintenance, delivery from 60 per cent to 100 per cent
- gross profit from 30 per cent to 44 per cent
- construction build times typically reduced by 25 per cent
- defects reduced by 90 per cent in timber frame
- tender applications hit rate improved from one in six to four in six
- productivity improved by 25 per cent on reactive maintenance
- 55 per cent improvements on planned activities achieved on the design process.

Who should attend?

CEOs, operations directors and managers, project managers, housing officers, clients, construction managers, maintenance managers and anyone responsible for improving operations in a construction setting.

Terms and conditions:

All events must be paid in advance. Confirmation of your booking will be sent upon receipt of completed booking form together with payment. Any registration fee paid will not be refunded unless written confirmation of cancellation is received at least five working days before the event. Substitute delegates are welcome by notifying 6ix Consulting. We reserve the right to vary the programme or cancel the event in case of insufficient bookings. In case of cancellation all monies will be refunded to registered delegates. Personal data is gathered in accordance with the Data Protection Act 1998. 6ix will contact you only about products and services relevant to you and your organisation.
